ISAIAS BRIAN TRUJILLO RIVERA

Lima, Peru | +51 953 045 438 | cv@itrujillo.dev | linkedin.com/in/ibtrujillo

Full Stack Developer. React in production since 2023: institutional and clinical systems, REST APIs, PostgreSQL, WebSockets, Docker/Nginx.

WORK EXPERIENCE

Faculty of Economic Sciences – UNMSM *07/2025 – Present*
Webmaster & Frontend Developer Lima, Peru

- Migrated 3 institutional websites to Astro with Tailwind CSS, reusable components, responsive design and accessibility, following the guidelines of each unit.
- Manage unit content through Astro Collections, speeding up updates.
- Websites in production: economia.unmsm.edu.pe/cesepi · economia.unmsm.edu.pe/posgrado

Faculty of Accounting Sciences – UNMSM *01/2025 – 06/2025*
Full Stack Developer Lima, Peru

- Developed a real-time attendance system (WebSockets) for more than 100 teachers, with individual, bulk or QR-code check-in for students, and an administrative monitoring panel showing teachers' status according to their schedule.
- Designed a hierarchical model of groups and subgroups that solves the historical loss of attendance traceability across different academic processes, unifying how information is organized across the five applications of the project.
- Built in React the teacher survey application used by more than 3,000 students, with immediate response recording and a progress tracking panel for administrative staff.
- Deployed each backend service in independent Docker containers with an Nginx reverse proxy for secure connections (HTTPS/WSS).

Clínica Maisón de Santé *03/2024 – 09/2024*
Full Stack Developer Lima, Peru

- Developed in React a patient satisfaction survey system with dynamic questionnaires and unique links, with a question bank adapted per medical service, extending the existing API in Laravel and PostgreSQL.
- Implemented an analytics dashboard in Angular with KPIs, NPS and charts of satisfaction trends by service and month.
- Refactored the components of the Angular dashboard and its service calls, reducing its load time from over 15 seconds to under 1 second.

Faculty of Accounting Sciences – UNMSM *05/2023 – 12/2023*
Full Stack Developer Lima, Peru

- Developed a teacher evaluation survey, with a React frontend and a PHP backend, to improve the collection and reliability of information.
- Wrote Python scripts to clean and standardize more than 20,000 enrollment records before loading them into a MySQL database, and manually handled atypical schedule and group cases.
- Maintained the legacy attendance application and its MySQL database to generate attendance reports for teachers and students.

EDUCATION

National University of San Marcos Lima, Peru *2024*

Bachelor's Degree in Systems Engineering

CERTIFICATIONS

API Security Architect (API Academy, 2023), API Designer (API Academy, 2023), Scrum Foundation (SCRUMstudy – VMEdu, 2022)

SKILLS

Frontend: React, Astro, Angular, TypeScript, Tailwind CSS, Shadcn UI, Zustand
Backend: Node.js, REST APIs, PostgreSQL, JWT, Zod
Infrastructure: Docker, Linux, Nginx
Tools: GitHub, Postman, Figma
